

Pavement Ant Treatment

CLIENT PREPARATION FORM

For our company to provide the most effective service possible, we ask you to review and complete all the necessary steps listed below. The following steps will ensure that your technician is able to provide an effective and safe treatment.

How to Prepare for the Service

KITCHEN

(if this is the area of concern)

- ▶ In areas where ants are seen and in particular the kitchen, empty bottom cupboards and bottom of closets.

EXTERIOR OF THE HOME

- ▶ Move all planters, patio furniture, etc 12" (30 cm) away from the walls.

LIVING ROOM, BEDROOMS, ETC

- ▶ Move all furniture 12" (30 cm) away from the walls. Please be sure to exercise safety first and do not attempt to move large furniture.
- ▶ Clear all closet floors and shelves of shoes and other items. Clothing on hangers may be left in place.

After the Treatment

The treatment will remain effective only if the following steps are taken after your home is serviced:

- ▶ **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near bait placements or spray, as this will decrease or eliminate their effectiveness.

- ▶ Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing the trash on a regular basis, etc.).

Reminder

- ▶ When a spray is applied inside your residence, you and your pets will be required to vacate the premises. Typically, a 4-hour window is sufficient. However, your representative will advise you at the time of service or leave an information notice at your premises if additional time is required.
- ▶ Persons with underlying health conditions should consult their family physician if they are concerned about re-entry time.

- ▶ Upon re-entering, please open the windows for 20-30 minutes.
- ▶ Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.

What You Can Expect from the Treatment

- ▶ Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician. These have

all been strategically positioned to maximize their effectiveness. All treatments are made with your safety in mind to ensure your health.
