

Pharaoh Ant Treatment

CLIENT PREPARATION FORM

For our company to provide the most effective service possible, we ask you to review and complete all the necessary steps listed below. The following steps will ensure that your technician is able to provide an effective and safe treatment.

How to Prepare for the Service

KITCHEN & AREAS OF ACTIVITY

- ▶ Empty the cupboards, drawers & closets experiencing the pest issue or signs of activity.
- ▶ Keep all removed items within the kitchen area – on the kitchen table to prevent the pharaoh ants from spreading to other locations.
- ▶ Ensure no potential food or water sources are around to attract the pharaoh ants.
- ▶ Ensure all exposed food is in tightly sealed containers.
- ▶ Clean up any food spills or garbage.

AREAS TO BE MADE ACCESSIBLE:

Bathrooms, heating registers, electrical conduits.

After the Treatment

The products applied will remain effective only if the following steps are taken after your residence is serviced:

▶ **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near spray treatments, as this will decrease effectiveness.

- ▶ Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing the trash regularly, etc.).
- ▶ You may place back all kitchen items after the treatment is complete.

Allergen Notification

Some of the products we utilize for controlling pharaoh ants contain allergens such as peanut butter and shellfish. Please alert your technician and superintendent where concerns over allergens exist before the treatment.

Reminder

You or your pets don't need to leave your home before, during, or after the treatment.

Please be patient. The baits will reduce pharaoh ant infestations to very low levels within approximately 3 to 4 weeks.

What You Can Expect from the Treatment

▶ Your technician will use a number of methods to control the pest depending on each unique situation. Please do not move or tamper with any traps, monitors or products applied by your technician.

These have all been strategically positioned to maximize their effectiveness. All treatments are made with your safety in mind to ensure your health.
