

# Cluster Fly Treatment

## CLIENT PREPARATION FORM

In order for our company to provide the most effective service possible, we ask that before our arrival you review and complete all the necessary preparations listed below. The following steps will ensure that your Technician is able to provide an effective and safe treatment.

### How To Pest Proof & Prepare For The Service

Install insect screening over air vents that lead to the outside

#### ATTIC

- ▶ Allow safe access to the attic door for your Technician.

#### INSIDE/OUTSIDE:

- ▶ Have the blinds up or removed
- ▶ Have drapes open or removed
- ▶ Have nothing sitting on the window ceils (like pictures)
- ▶ Move furniture away from window if it sits in front or close to it

#### DOOR & WINDOW SCREENS

- ▶ Ensure that all screens fit properly and have no cracks or holes.
- ▶ Weather strip windows, doors, light fixtures & wall plates.

---

## After The Treatment

---

The treatment will remain effective only if the following steps are taken after your home is serviced:

▶ **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near the

the treatment, as this will decrease effectiveness.

▶ Vacuum all dead cluster flies. Vacuum bag should be discarded immediately upon completion.

---

## Reminder

---

(When the home is treated, including the attic)

**It is necessary for you and your pets to leave your home for 4 hours once the treatment begins.**

Fish aquariums maybe left onsite, however they should be covered and air filters must be disconnected. Per-

sons with underlying health conditions should consult their family physician where they have concerns regarding re-entry time. Upon re-entry, please open windows for 20 min to properly ventilate the treated rooms.

---

## What You Can Expect From The Treatment

---

A complete interior and exterior inspection will take place to locate any cluster fly activity. Your Technician will use a variety of methods to control the cluster flies depending on each unique situation. It

may be necessary to treat the attic and exterior of the home.

**All persons and pets are to be kept away while the Technician is treating the area.**
