

Pharaoh Ant Treatment

CLIENT PREPARATION FORM

In order for our company to provide the most effective service possible, we ask that before our arrival you review and complete all the necessary preparations listed below. The following steps will ensure that your Technician is able to provide an effective and safe treatment.

How to Prepare for the Service

KITCHEN & AREAS OF ACTIVITY

- ▶ Empty the cupboards, drawers & closets that are experiencing the pest issue or signs of activity
- ▶ Keep all removed items within the kitchen area, i.e. on kitchen table to prevent the Pharaoh Ants from spreading to other locations.
- ▶ Ensure that there are no potential food or water sources available which could attract the Pharaoh Ants
- ▶ Ensure all exposed food is placed in tightly sealed containers
- ▶ Clean up any food spills and/or garbage

AREAS TO BE MADE ACCESSIBLE:

Bathrooms, heating registers, electrical conduits.

After the Treatment

The bait will remain effective only if the following steps are taken after your home is serviced:

- ▶ **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products anywhere near bait placements, as this will decrease or eliminate the effectiveness of the bait(s).
- ▶ Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing trash on a regular basis, etc.)
- ▶ The bait stations must be left where the Technician has placed them.
- ▶ **DO NOT** use off the shelf chemicals; this can actually make the situation worse.

Reminder

It is not necessary for you or your pets to leave your home before, during or after the treatment.

Please be patient, the BAITS will reduce PHARAOH ANT infestations to very low levels within approximately 3 to 4 weeks.

Allergen Notification

Some of the products we utilize for controlling Pharaoh Ants contain allergens such as peanut butter and shellfish. Please alert your Technician and/or Superintendent where concerns over allergens exist prior to the treatment.

What You Can Expect from the Treatment

The bait will remain effective only if the following steps are taken after your home is serviced:

- ▶ DO NOT use other pest control chemicals (powders or sprays) or cleaning products anywhere near bait placements, as this will decrease or eliminate the effectiveness of the bait(s).
- ▶ Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing trash on a regular basis, etc.).
- ▶ Any bait stations must be left where the Technician has placed them.
- ▶ DO NOT use off the shelf chemicals; this can actually make the situation worse.
